

## **ZHANG Xingdong**

Professor and Honorary Director of National Engineering Research Center for Biomaterials at Sichuan University in China, Academician of Chinese Academy of Engineering and Chairman of Chinese Committee for Biomaterials. He graduated from the department of physics at Sichuan University in 1960 and has been engaged in biomaterials studies since 1983. His academic research focused on innovative biomaterials and medical implants for regenerative medicine and tissue engineering, especially on tissue-inducing biomaterials, calcium phosphate-based biomaterials, surface and surface modification of biomaterials, bone tissue engineering and implants for dental and orthopaedic applications. He has received numerous awards, including Chinese National Natural Science Award (2007), Chinese National Science and Technology Progress Award (1998). Fellow of Biomaterials Science & Engineering, IUSBSE(2000), and Chinese National Expert with Outstanding Contribution (1992).
